EMERGENCY PROCEDURES
(DEALING WITH AN ANAPHYLACTIC REACTION)

ACT QUICKLY. THE FIRST SIGNS OF A REACTION CAN BE MILD, BUT SYMPTOMS CAN GET WORSE QUICKLY.

STEPS

1. Give epinephrine auto-injector (e.g. EpiPen®) at the first sign of known or suspected anaphylactic reaction.

2. Call 9-1-1 or local emergency medical services. Tell them someone is having a life-threatening allergic reaction.

3. Give a second dose of epinephrine as early as five (5) minutes after the first dose if there is no improvement in symptoms.

4. Go to the nearest hospital immediately (ideally by ambulance), even if symptoms are mild or have stopped. The reaction could worsen or come back, even after treatment. Stay in the hospital for an appropriate period of observation as decided by the emergency department physician (generally about 4 — 6 hours).

5. Call emergency contact person; e.g. Parent(s)/Guardian(s).
